Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 November 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-8, drawn to a method of packaging leaky fuel rods.

Group II, claims 9-11, drawn to a packaging device.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: a packaging device of the structure as defined in claim 9 and method for its use for packaging nuclear fuel elements is conventional as shown for instance by Fischer et al (4,780,269), who teach a packaging device (12) (Figure 1 and column 3, lines 20-62) with loading structure (floor serviceable by crane (16) (Figures 1-2 and loc.cit.) that is capable of being used for loading nuclear fuel rods, including defective nuclear fuels rods, into capsules 12 (loc.cit.), the structure having a loading location 18 (in pool 18; see Figure 1 and column 3, lines 20-35) capable of being used for loading each capsule with a defective fuel rod, and a filling location capable of being used for filling each capsule with an inert gas (on floor slab shown as lowest element depicted in Figure 2) (column 3, lines 36-45; for inert

gas in the form of helium gas see again column 3, lines 36-45)); a guide and holder device 43 having positioning means 38 capable of being used for positioning it on the loading structure (Figures 6-A and 6E, and column 3, line 63 – column 4, line 38); a support structure 14 for capable of being used for supporting capsules for long-direction or very-long-direction warehousing (column 4, lines 4-10); and a tool for handling and filling the capsules (crane 16; column 3, line 28). Therefore, a fortiori, claims 1 and 9 do not have a same or corresponding technical feature. Dependent claims 2-8 and 10-11 diverge in subject matter and special technical features.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
